Once the homepage displays you will be able to navigate your way around the anatomy of the human body by clicking on your chosen module.

You can search by keyword or you can use the A-Z index where you will find a list of anatomical topics, you can also hear the correct pronunciation by clicking on the speaker icon.

The A-Z index gives you access to specific information but also gives the recording of the correct pronunciation. Once you have selected your chosen module you will be able to browse text, view 3D images, watch videos, view how aging affects the anatomy, access a clinical overview including conditions, causes and treatment, read case studies and take part in interactive quizzes.
Anatomy & Physiology online User guide

The home button takes you back to the module menu.

Scroll to navigate through different topics.

Search for different topics

Topic objectives

Displays an index of topics and links to movies or slides.

Displays a menu of interactive learning activities
